

Australia's best smart air-conditioning system

Being first to market with a smartphone app and tablet based controller makes MyAir smart air-conditioning the market leader in Australia. Whatever your idea of comfort is, MyAir lets you control the airflow to any room from anywhere, all without having to compromise on energy efficiency.

- Australian made and supported
- MyZone for more choice and energy savings
- MyTemp efficiently manages temperature control in each zone
- App to control your comfort from anywhere in the world
- More precise air management for greater personal comfort
- Set to automatically run tasks
- Intuitive 8" touchscreen that is also a fully functional Android tablet
- Expandable smart home platform
- MyAir's smart system means savings up to \$450 annually*

* An average ducted system zoned correctly, with temperature sensors will save almost \$450 per year in running costs.

ADVANTAGE AIR®

advantageair.com.au/myair

AUSTRALIAN MADE AND SUPPORTED

We are a proudly Australian technology company, committed to producing quality products and providing exceptional service. Our friendly MyTeam will even come and give you an in-home demonstration and handover, to ensure you get the most out of your MyAir. And if you need after sales support, we're based locally in Australia, waiting to help.

CONTROL YOUR COMFORT FROM ANYWHERE

First to market with a smart app that turns smartphones or tablets into a wireless remote control, so you can control MyAir from anywhere in the world.

MORE CHOICE WITH MYZONE & MYTEMP

MyZone acts as a thermostat for your entire MyAir system. MyZone can be any room with an ITC sensor, and it gives you more choice and control over how you run your air-conditioning. MyTemp goes one step further and will work to achieve the desired temperature of each zone and maintain this temperature, giving you greater comfort and energy savings.

MORE PRECISE AIRFLOW MANAGEMENT

As we couldn't achieve the level of airflow control we were after with conventional dampers, we designed our own: the Exact Air Regulator. Instead of a single scoop it has Opposed Blade Dampers (OBDs). Think of them as a series of double doors that can open and close in 5% increments so you achieve your preferred temperature as energy efficiently as possible.

CUSTOMISE YOUR SYSTEM WITH EVENTS

This feature gives you the ability to automatically run "Tasks" when specific weather conditions occur in your area! Away from home? Events will send a notification when a "condition" occurs to your smartphone or tablet. Smart functionality that thinks for you.

MAKE MYAIR EVEN SMARTER

If you already have MyAir, MyPlace can be easily added to the hub that's already installed in your home. It makes smart home technology simple, by working with existing products in your home such as lights, fans, blinds and your garage door. You can also add on MyPlace security products to make you feel even more comfortable, safe and secure.

AUSTRALIA'S MARKET LEADER

For over 20 years, Advantage Air's R&D team of engineers, software developers and UX designers have been developing market leading tech products. Our focus is a smart home system that is genuinely useful; that will make life easier and home more comfortable.

We partner with some of Australia's top builders.
